

Permanent Course									
NOVICE									
You must go to the control points in sequence									
Novice		4.1 km			60 m				
									Start: road and path crossing
1	51								SW small depression
2	52			0.7					Boulder, 0.7m high
3	53								Bend in ride
4	54			0.4					Boulder, 0.4m high
5	55								NW end of bridge
6	56								Reentrant
7	57								Knoll
8	58								SE side of knoll
9	59								SW end of narrow marsh
10	60								W small depression
11	61								SW side of boulder cluster
12	62								Clearing
13	63			1.0					N side of boulder, 1m high
14	64								Spring
15	65								S side of boulder cluster
		220 m						Navigate 220 m to finish	

The **Novice** course is a sequence of numbered purple circles. The control descriptions describe the features at the centers of the circles where control stands are located. For example, consider imaginary control #9. Suppose the description says:

9. (33) Path crossing

and on the map the 9th control looks like the drawing above. At the center of the circle, two dashed lines (paths) cross. Also in the circle is a pit (the V); but the description tells you where the control stand is (at the crossing, not at the pit).

Each control stand has a 4" red and white marker with a control number (here #33) and a control code (a single letter, here H) on it. When you find a control stand, make sure the control number is correct; then **write the letter code** of that control in the box of the control card that corresponds to the control number. Note: Start/ Finish also has control stand but no letter code.

General recommendations: Wear long pants in summer. There may be ticks of various kinds; use repellent.

### Control Card for the Novice course

Name _____					 WPOC	FINISH			
Course _____						START			
Date _____						TIME			
61	62	63	64	65					
51	52	53	54	55	56	57	58	59	60

You may time yourself using the spaces on the Control Card and compare your time to that of others. You may also check the codes for accuracy by asking at the program hall.
